Release Notes: The software update will provide functionality/ usability improvements to the features and capabilities of this model. These are as follows:

- added new Large Numbers feature when adjusting volume with remote or RS-232.
- added new speaker "configurations" feature which enhances what was called "positions" in previous software releases. 4 separate configurations now available.
- implemented partial CAN bus support.
- updated speaker distance resolution to include feet/inches and meters/centimeters.
- added new feature: after assigning an input to an F-key, unit will now wake from standby when selecting this F-key/input.
- added new feature : zone on trigger event.
- added new feature: when selecting 'main source' in the zone source menu, the zone will follow the main source.

- This software release is a stage in the CAN Bus launch process. Details relating to the official CAN-Bus launch will shortly be posted on the Classe website [www.classeaudio.com](http://www.classeaudio.com). CAN-Bus will not be fully operational before this point.
